1. Install the CalDigit Drive Utility (CDU) for Mac OSX

2. After installation and restart, the CDU icon will appear on the top menu bar.
When the AV Pro is connected, the CDU software will automatically sync with the AV Pro.
Download, and install the ThunderView app (Available for free on the iOS App Store & the Google Play Store).
5 Connect your smartphone via WIFI to the same network as your Host Computer.
6 On the ThunderView homepage, click on the “IP Address” page, click on “Edit”, and then click on the “+” button.
7 Enter the IP address of the network that your host computer is connected to (In order to find the IP address of your network, go to System Preferences - Network).

8 Press the green “V” to confirm the IP address.
9 The ThunderView app will recognize your AV Pro device.
