

Before updating your TS5, please check the revision of your TS5 to ensure you select the correct Bin file when updating your unit.

You can find the revision of your TS5 by opening the Settings application → Bluetooth & devices → USB → USB4 Hubs and Devices. Please use the screenshot at the bottom of this PDF for reference.

If the Unit Revision shows 1, please open the Unit-Rev.1 folder and select the Rev\_1 bin file during the update process. If the Unit Revision shows 2, please open the Unit-Rev.2 folder and select the Rev\_2 bin file.
